

ANGLE BLADE ASSEMBLY

**CLEAR LAND EFFICIENTLY
WITH YOUR DOZER!**

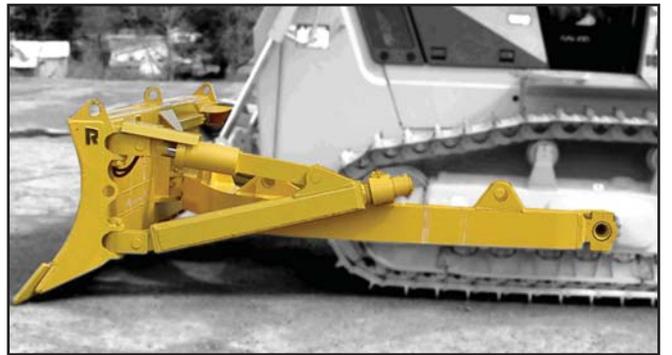

Rockland Angle Blade Assemblies are designed for backfilling, cutting ditches, grading and other similar earthmoving tasks. They are extremely useful for land clearing, pipeline pioneering, and road building applications in rocky, mountainous terrain.

The angle blade comes complete with a heavy-duty c-frame and brace group, ready to mount on your dozer. The blade is mechanically angled side-to-side and features a tough, durable design made to handle heavy-duty land clearing applications. Options include hydraulic or manual tilt for either standard or LGP tractors.

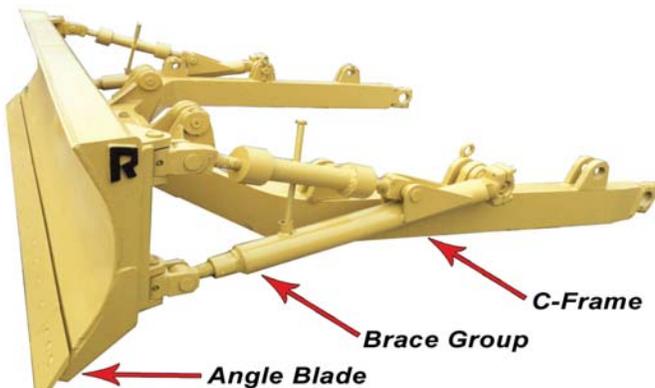

All Rockland ABL Angle Blades are manufactured from high-strength, weight-saving alloy steels that deliver years of dependable service. Hydraulic tilt struts feature induction hardened, chrome plated, oversized protected cylinder rods with long life, high-pressure seals.

Angle blade, brace group and c-frame.

*Perfect for rugged road building
and pipeline applications.*

INSTALLATION INFORMATION

The Angle Blade Assembly requires the tractor to be equipped with outside-mounted trunnions and front-mounted lift cylinders.

WARRANTY

Angle Blade Assemblies are guaranteed against failure due to defective design, materials, or workmanship for a period of one year or 2,000 hours.
