

MAXXIS TIRES

WELCOME TO OUR WORLD

Since 1967, Maxxis has been delivering high-quality tire products through a continued commitment to excellence. With input from our roster of championship-winning drivers, we can ensure that our products measure up to the toughest real-world standards. Whether you're winning a race or simply enjoying your daily commute, Maxxis is the tire company you can trust.

A race tire built by racers, for racers. Whether you're a club racer, track day enthusiast or an enduro racing warrior, the Victra RC-1 was designed to deliver an addicting combination of grip, handling and heat cycle performance.

- DOT-approved R-compound race tire designed for dry road racing applications ONLY
- Specially formulated racing compound delivers outstanding dry traction while retaining excellent heat cycle and wear performance
- Balanced sidewall design delivers smooth breakaway characteristics and excellent handling
- Dual wide circumferential grooves designed to perform under sudden wet weather conditions
- Due to the nature of the tread compound, these tires require special care when stored in near-freezing temperatures. Please visit www.maxxis.com for more details
- UTQG 100 A A

- 1 Reinforced Bead Wire Package**
Ensures optimum contact between wheel and tire for improved air retention.
- 2 High Modulus Bead Filler Rubber**
Increases sidewall stiffness for better steering feedback and response.
- 3 High Strength Body Casing**
Increases overall tire stiffness for excellent durability, handling and response.
- 4 High Tensile Strength Steel Belts**
Increases under-tread stiffness for great cornering performance and tread wear.
- 5 Spiral-Wound Cap Ply**
Improves overall tire uniformity and high-speed stability.

Building on our extensive experience in off-road racing, the Victra R-19 is our latest weapon to help rally drivers tackle the toughest gravel stages in the world. The tire features multiple reinforcements in the tread and sidewall to maximize durability so drivers can focus on the task at hand.

- Designed for rally racing applications ONLY
- Multiple independent tread blocks and closed sipe design improve acceleration and braking traction
- Sharp tread blocks and reinforced sidewall casing deliver optimum handling and feedback
- Specially formulated tread compounds and rib protector design enhance impact and puncture resistance
- Available in soft, medium and hard tread compound options
- Computer-optimized pattern design for minimized rock retention and improved water dispersion

VICTRA R-19 GROOVING RECOMMENDATIONS

Tire grooving must be done by trained professionals only

HEAVY RAIN

SHOWERS

LIGHT RAIN

COMPOUND	ROAD SURFACE	ROAD CONDITION			AMBIENT TEMPERATURE											
		Soft/Sandy	Hard/Rocky	Packed	Wet	Damp	Dry	5°C	10°C	15°C	20°C	25°C	30°C	35°C	40°C	
Hardness	Working Temp.															
Soft	20°C-60°C															
Medium	50°C-100°C															
Hard	90°C-120°C															

Tire Pressure Recommendations:

1. From service to competition area, the recommended pressure is 220-250kpa.
2. During competition, the recommended pressure is 180-220kpa.

Designed for the motor sports enthusiast, the Victra VR-1 is a tire for drivers who want it all. The VR-1 features a compound that warms to operating temperature quickly and provides tenacious dry traction on the street or the track. The VR-1's compound also heat cycles well, ensuring consistent lap times throughout the life of the tire. The new pattern was designed to maximize dry performance while minimizing white-knuckle moments in wet weather. The reinforced casing design provides almost telepathic responses, allowing the driver to put the car where it needs to be.

- New compound reaches operating temperatures quickly and provides excellent dry traction and heat cycling performance
- New reinforced casing and sidewall design provide the ultimate driving experience
- New pattern design maximizes dry performance while minimizing white knuckle moments in wet conditions
- Due to the nature of the tread compound, these tires require special care when stored in near-freezing temperatures. Please visit www.maxxis.com for more details
- UTQG 200 AA A

- 1 Continuous center rib design improves braking and high-speed performance
- 2 Wide Circumferential Grooves channel water away from the contact patch, improving hydroplaning resistance
- 3 Reinforced Multi-Pitch Tread Blocks reduce pattern noise while improving handling and steering precision

ULTRA HIGH PERFORMANCE

A run-flat UHP tire designed for premium vehicles, the M36+ improves upon the M36 by adding run-flat technology. The Maxxis Run-Flat System (MRS) helps the driver retain vehicle control and peace of mind during sudden loss of air pressure.

- Ultra high performance run-flat tire designed for luxury sports sedans
- Solid center rib with siping designed for high-speed stability and traction
- Continuous outer shoulder design enhances cornering stability
- Four wide circumferential grooves provide excellent hydroplaning resistance and wet traction
- Advanced casing material provides increased heat resistance and maintains tire integrity under zero inflation pressure
- Innovative bead filler design minimizes heat build-up and improves durability under zero inflation pressure
- New sidewall construction and compound allow vehicle to travel up to 50 mph under zero inflation pressure
- UTQG 300 AA A

- 1 Body-PLY (Rayon) - New ply material provides increased heat resistance and maintains tire integrity and durability under zero inflation pressure
- 2 PAD (Sidewall Reinforcement Rubber) - Advanced rubber compound and construction design form the foundation of MRS, providing optimal safety and comfort even under zero inflation pressure
- 3 New Bead Filler Design - New bead filler compound minimizes heat build-up and improves durability even with zero inflation pressure
- 4 Sidewall Reinforcement Ply - Reinforced bead design minimizes area deformation, securing the tire and wheel assembly for added durability under zero inflation pressure

An asymmetric UHP Summer tire designed for premium sport sedans, the VS-01 features modern tread technologies to minimize perceived pattern noise. The tire also features many structural reinforcements and high-strength materials to sharpen handling while maintaining a civilized ride.

- Continuous center rib design improves braking and high-speed performance
- Reinforced shoulder blocks reduce deformation when cornering for improved handling, traction and steering precision
- Multi-pitch tread block technology works like noise-canceling headphones to filter unwanted pattern noise in cabin
- High-strength steel belts and hard bead filler work together to improve steering response for a sportier feel
- EU labeling grade - E/B [RR/WG]
- UTQG 240 AA A

- 1 Continuous center rib design improves braking and high-speed performance
- 2 Reinforced Multi-Pitch Tread Blocks reduce pattern noise while improving handling and steering precision
- 3 Wide Circumferential Grooves channel water away from the contact patch, improving hydroplaning resistance

A directional UHP summer tire that isn't afraid of the rain, the MA-Z3 features aggressive grooving and a microsilica-infused tread compound for improved wet weather performance. Large 3D shoulder and high-stiffness casing design ensures that the MA-Z3 can devour turns with the best as well.

- Ultra high performance tire designed for sports cars and sedans
- Aggressive directional tread with two circumferential grooves reduces pattern noise and hydroplaning resistance while retaining good performance in dry road conditions
- Large 3D shoulder blocks increase tread stiffness for better handling and steering response while improving tread wear
- UTQG 300 A A

Highly dispersible silica in Maxxis' new compound promotes excellent filler dispersion - minimizing heat generation and energy dissipation for improved rolling resistance.

- 1 Continuous center rib design improves braking and high-speed performance
- 2 Reinforced Multi-Pitch Tread Blocks reduce pattern noise while improving handling and steering precision
- 3 Wide Circumferential Grooves channel water away from the contact patch, improving hydroplaning resistance

An all-season UHP tire enhanced for wet weather performance, the MA-Z4S features aggressive rain grooves to channel water away with great efficiency so you can drive with the greatest peace of mind. Some sizes feature additional edge plies for maximum high-speed stability and driving confidence.

- Ultra high performance all-season tire designed for drivers who demand sporty handling with all-season traction
- Solid center rib designed for high-speed stability
- V-shaped unidirectional grooves for improved handling on dry and wet roads
- Jointless spiral-wound cap ply maximizes ride refinement and durability
- Four circumferential main grooves expel water for enhanced hydroplaning resistance and wet traction
- 5-pitch tread blocks and 2-in-1 groove design minimize noise for a quiet, comfortable ride
- M&S All-season rated
- UTQG 420 A A - 420 AA A

Multiple snow-biting grooves and optimal siping design for great traction on snowy surfaces.

4 high-void, circumferential main grooves expel water for enhanced wet traction.

Solid Center Rib designed for high speed stability. V-shaped unidirectional grooves for improved handling on dry and wet roads.

5-pitch tread blocks and 2-in-1 groove designs minimize noise for a quiet, comfortable ride.

A standard non-directional UHP tire engineered to deliver great value for this segment, the MA-511 is a solid performer in the dry but features wide grooves and a dual layer silica tread compound to further enhance wet weather performance. The new rib design promotes even tread wear and minimizes pattern noise over the life of the tire.

- Five-rib pattern design engineered to improve tire wear, pattern noise and high-speed stability
- Four main circumferential grooves expel water quickly for improved hydroplaning resistance
- New dual-layer silica-infused tread compound improves wet performance and rolling resistance
- UTQG 400 A A

- 1 Dual layer silica tread compound improves rolling resistance and wet performance
- 2 High-Strength Casing Design improves response

A standard UHP tire engineered to reduce our carbon footprint, the HP5 was engineered to feature the same Maxxis handling prowess but with more focus on low rolling resistance technologies. The full silica tread compound and bead filler design helps reduce rolling resistance while maximizing ride comfort and wet traction.

- Ultra high performance tire designed for increased comfort with low rolling resistance technologies
- New silica compound formulated to reduce rolling resistance and improve wet performance
- Unique new bead filler design improves rolling resistance and ride comfort
- Rib pattern design with four circumferential grooves improves hydroplaning resistance and handling
- Curved shoulder groove design reduces vibration noise in tread area
- UTQG 340 AA A

- 1 **Static Electricity Conduction Channel**
Discharges unwanted static electricity from the tire to minimize static shock.
- 2 **Full-Silica**
Full silica tread compound engineered to lower rolling resistance and maximize wet weather performance for extra peace of mind.
- 3 **Slim Bead Filler**
New Bead Filler design lowers rolling resistance and improves ride comfort.

- 1 **Continuous Outside Blocks**
Continuous shoulder block design (orange) maximizes road contact for improved steering response and cornering traction.
- 2 **Curved Shoulder Grooves**
Arc shoulder groove design (green) reduces turbulent air noise for a more serene ride.

PASSENGER CAR RADIAL

An all-season premium touring tire, the MA-T1 features a new mileage-oriented compound for outstanding tread wear performance. The MA-T1 also features a non-directional symmetric pattern that can be rotated to minimize pattern noise throughout the life of the tire.

- All-season touring tire designed for premium touring vehicles
- Non-directional tread pattern provides quiet ride
- Specially formulated compound optimized for long wear
- Four high-void circumferential grooves offer excellent hydroplaning resistance
- Overall construction and design maximizes ride refinement
- Jointless spiral-wound cap ply maximizes ride refinement and durability
- M&S All-season rated
- UTQG 560 AA - 720 AA (See dealer for specific UTQG information)

One of the new generation of ECO touring tires, the ME-3 features a nano-silica tread compound to enhance wet performance and rolling resistance. The ME-3 also features a new sipe design that helps absorb water away from the tread contact surface for improved hydroplaning resistance.

- An Eco-friendly touring tire with great rolling resistance and wet weather performance
- New nano-silica tread compound improves rolling resistance and wet weather performance
- New siping design helps absorb water away from contact patch for improved wet weather performance
- Reinforcement bridges on shoulder areas increase shoulder block stiffness for improved handling
- UTQG 380 A A

Highly dispersible silica in Maxxis' new compound promotes excellent filler dispersion - minimizing heat generation and energy dissipation for improved rolling resistance.

- 1 Nano-Silica Compound**
New Nano-Silica compound improves rolling resistance and wet weather performance.
- 2 3D Sipes**
3D sipes on center rib and shoulders (green) increase traction edges for improved traction on slippery and wet surfaces.

An Eco-touring tire, the i-ECO features our new UHR tread compound which helps absorb impact from bumps and other road imperfections for a smoother ride. The nano-engineered silica in the UHR rubber helps to minimize rolling resistance and maximize fuel economy, while the patented water groove design minimizes pipe resonance to reduce cabin noise.

- An Eco-friendly touring tire designed for smaller sedans and hatchbacks
- New UHR tread compound features nano-technology for improved rolling resistance and overall traction
- Unique sidewall compound engineered to smooth effects of road imperfections for excellent comfort
- New tread pattern with three circumferential grooves improves hydroplaning resistance and wet braking performance
- Enhanced casing design features improved road contact for better tire wear
- UTQG 340 A A

Highly dispersible silica in Maxxis' new compound promotes excellent filler dispersion - minimizing heat generation and energy dissipation for improved rolling resistance.

WET BRAKING IMPROVES 7.3% Speed: 80-0km/h

Based on the highly successful MA-P1, the MA-P3 further refines the driving experience. With a new closed shoulder design to minimize noise resonance in the tread area for reduced cabin noise, the MA-P3 features a new construction design to maintain a stable contact patch for improved braking performance as well as overall traction.

- A Performance touring tire designed for modern sedans
- New center rib design delivers increased handling response and braking performance
- Closed shoulder pattern design minimizes pattern noise for greater driving comfort
- Proven robust casing for extra durability, handling and peace of mind
- New tread compound minimizes rolling resistance and maximizes tread wear
- UTQG 440 A A - 440 A B (See dealer for specific UTQG information)

A standard touring tire designed to improve pattern noise and wet performance, the MP-10 features a high-density groove and sipe design for additional traction edges on slippery road surfaces. The rib pattern design improves overall wear and reduces pattern noise, while the solid center rib enhances high-speed stability and braking.

- Non-directional rib pattern improves overall tread wear and minimizes pattern noise over the life of the tire
- High-density groove design increases traction edges on tread surface for improved traction on slippery surfaces
- Optimized construction design improves overall contact patch to minimize irregular wear
- UTQG 500 A A

- 1 Solid center rib (yellow) provides additional rigidity for improved high-speed stability and overall handling
- 2 High-density groove design (red) increases traction edges for improved grip on wet and slippery surfaces
- 3 Closed shoulder tread design (green) improves tread block rigidity for better overall handling and minimized pattern noise

A summer asymmetrical UHP designed for premium SUVs, the S-Pro features a new water groove design that minimizes pipe resonance for a more serene driving experience. The S-Pro also features a new hybrid profile design for maximized road contact and improved overall wear.

- Summer Ultra High Performance tire designed for premium SUVs
- Patented groove design minimizes pipe resonance for a quiet and serene cabin
- Asymmetrical pattern with large outside shoulder blocks for improved handling
- 4 circumferential grooves improve water dispersion for better hydroplaning resistance
- Hybrid profile design maximizes road contact and improves overall tread wear
- Nano silica-infused compound improves chemical bonds in tread rubber for improved mileage
- UTQG 280 AA A – 360 AA A (See dealer for specific UTQG information)

Tire Profile Comparison
Hybrid profile design maximizes road contact and improves overall tread wear.

- 1 Asymmetrical pattern with large outside shoulder blocks (green) for improved handling
- 2 Patented groove design (red) minimizes pipe resonance for a quiet and serene cabin
- 3 Four circumferential grooves (blue) improve water dispersion for better hydroplaning resistance

An all-season UHP tire designed for light trucks and SUVs, the MA-S2 was engineered to deliver Maxxis UHP handling on much bigger vehicles. The construction design uses high-strength materials for improved lateral stability and handling, while the aggressive V pattern design helps improve all-season performance. The MA-S2 also features a pronounced rim protector to help prevent wheel damage when parking near curbs.

- All-season performance tire designed for SUV or light truck
- Directional high-void pattern designed for excellent all-season traction
- Jointless spiral-wound cap ply maximizes ride refinement and durability
- Solid center rib offers extra stability and confidence at higher speeds
- High-strength casing construction designed to improve lateral stability and handling
- Unique sidewall construction designed to improve steering precision and response
- Pronounced rim protector built to protect wheels from curb damage
- M&S All-season rated
- UTQG 360 A A

- 1 Central Rib Design (purple)
Improves stability at higher speeds.
- 2 V Groove Design (yellow)
Increases water dispersion for improved hydroplaning resistance.
- 3 Multiple Lateral Groove Design (blue)
Increases water dispersion under cornering for improved wet weather driving confidence.
- 4 3D Groove Edge Design (green)
Increases tread block stiffness for improved pattern wear performance.

A performance touring tire for crossover vehicles, the Escapade CUV was designed for drivers who want sports car handling in a crossover. The tire features adaptive response sidewall technology, delivering great comfort around town and responsive handling in turns. The Escapade CUV also features multi-pitch tread blocks for minimal pattern noise in the cabin and a premium driving experience.

- All-season high performance tire designed for crossover utility vehicles
- Adaptive Response Sidewall technology delivers a smooth ride when cruising and excellent handling during spirited driving
- Straight and slanted circumferential grooves increase water dispersion efficiency for excellent hydroplaning resistance and wet weather performance
- Large outer shoulder block design increases overall lateral stiffness for improved cornering and handling
- 2-in-1 groove design on inner shoulder increases wet weather traction while improving overall wear pattern
- Multi-pitch tread block technology minimizes pattern noise for a quiet and comfortable ride
- M&S All-season rated
- UTQG 520 A A

- ARS Comfort Zone**
Utilizing a low turn-up casing design, this section of the sidewall is compliant and absorbs bumps and road imperfections, delivering a smooth ride when driving casually around town.
- ARS Sports Zone**
Utilizing unique materials and sidewall design, this section of the sidewall is rigid and provides great cornering performance, delivering the handling and response similar to sport cars.

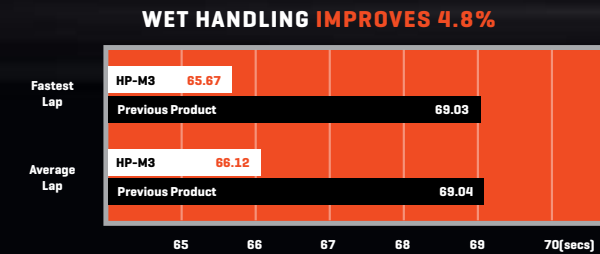

An all-season premium touring tire with car, crossover and SUV fitments, the HP-M3 was designed as an all-around performer in dry and wet conditions as well as light snow. The HP-M3 features cross-hatch sipes across the tread for added traction on slippery surfaces, while the four circumferential grooves improve hydroplaning resistance.

- 5-rib pattern design engineered to improve tire wear, pattern noise and high-speed stability
- 4 main circumferential grooves expel water quickly for improved hydroplaning resistance
- Streamlined lateral groove design improves overall wet performance
- M&S All-season rated
- UTQG 560 A A, 700 A A

- Solid center rib design provides better high-speed stability**
- Four wide circumferential rain grooves improve hydroplaning resistance**
- Multi-Pitch tread block design provides virtual white noise to drown out pattern noise**

LIGHT TRUCK RADIAL

LIGHT TRUCK

The Maxxis flagship highway terrain tire, the HT-770 development team improved on the finer details to create a tire worthy of being our flagship. Based on our motor sports experience, the team created a new sidewall design that delivers a supple ride while maintaining excellent stability under heavy braking and crosswinds. The engineers also utilized a closed shoulder pattern design and multi-pitch tread blocks to create a more serene driving experience.

- Premium highway terrain tire designed for light trucks and SUVs
- Ripple sipe design improves overall wear pattern and traction on slippery surfaces
- Dual circumferential grooves increase water dispersion efficiency for improved hydroplaning resistance
- Multi-pitch tread blocks minimize pattern noise for a quiet and serene cabin
- Closed shoulder design limits noise resonance in tread area, further reducing cabin noise
- M&S All-Season rated
- UTQG 650 A B [Non LT Sizes ONLY]

- 1 Dual Circumferential Grooves**
The high-volume circumferential grooves increase water dispersion efficiency for improved hydroplaning resistance.
- 2 Multi-Pitch Tread Blocks**
This technology works in a way similar to noise-canceling headphones. The shoulder blocks are designed to produce sounds that dampen annoying pattern noise so the cabin stays quiet and serene.
- 3 Closed Shoulder Design**
The closed shoulder design limits noise resonance in the tread area, which further improves the overall driving experience.

A premium all-terrain tire engineered to handle your favorite trail or work route, the AT-771 was designed to tackle asphalt, dirt, mud and everything in between. The unique pattern features wave siping and staggered shoulders for extra off-road traction, while the multi-pitch tread blocks minimize pattern noise for a refined driving experience.

- All-season, all-terrain tire designed for excellent off-road performance while retaining on-road refinement
- Multi-pitch tread pattern design minimizes pattern and road noise while maintaining excellent off-road performance
- Staggered shoulder lug design creates a biting edge for extra off-road traction
- 3D tread blocks provide additional tread stiffness to minimize irregular wear and increase overall stability
- Four unique U-shaped circumferential grooves offer excellent hydroplaning resistance while minimizing rock retention
- Jointless spiral-wound cap ply maximizes ride refinement and durability
- Overall construction designed to improve off-road stability and handling
- M&S All-season rated
- UTQG 500 A A – 500 A B (See dealer for specific UTQG information)

- 1 Four unique U-shaped circumferential grooves (blue) offer excellent hydroplaning resistance while minimizing rock retention**
- 2 3D tread blocks (purple) provide additional tread stiffness to improve the overall wear pattern, stability and steering feel**
- 3 Optimized sipe design (red) for improved wet performance and ride refinement**
- 4 Multi-Pitch tread pattern design (gold) minimizes pattern and road noise while maintaining excellent off-road performance**

An all-terrain tire with a classic pattern, the AT-980 features a new construction design to maximize road contact even under heavy loads, as well as improving puncture and bruising resistance. The unique zig-zag block design provides extra traction edges for improved off-road performance.

- Square tread contour design provides superior road contact even under heavy loads
- Reduced pitch ratio pattern design maximizes tread life and improves overall wear pattern
- Zig-zag groove design improves off-road traction
- Jointless spiral-wound cap-ply improves overall ride comfort and high-speed stability
- New casing design improves puncture and bruising resistance
- M&S All-season rated
- UTQG 500 A B [Non LT Sizes ONLY]

DRY BRAKING IMPROVES 1.6 M Speed: 100-0km/h

WET BRAKING IMPROVES 2.3 M Speed: 80-0km/h

Our flagship mud terrain tire, the RAZR MT was engineered with know-how gained from Maxxis' involvement in off-road racing. The RAZR MT features a new off-road compound with new chemical fillers for maximum tear and chip resistance as well as tread life. The new pattern features deeply sculpted center blocks for maximal mud traction, while stone and mud ejectors improve self-cleaning performance and minimize rock retention. Innovative armor sidewall design maximizes sidewall traction and puncture resistance, while deeply staggered shoulder blocks provide additional side bite in difficult terrain. For ultimate peace of mind, the RAZR MT uses dual-cord body-ply technology, packing additional casing strength for superior durability and toughness.

- New off-road compound with new chemical fillers for maximum tear resistance and tread life
- New Maxxis dual-cord casing technology dramatically improves casing strength for superior durability and toughness
- Innovative armor sidewall design maximizes sidewall traction and puncture resistance
- New pattern design featuring deeply sculpted center blocks that maximize off-road traction while keeping pattern noise in check
- M&S All-season rated

Maxxis dual-cord casing ply features intertwined reinforcement fibers, dramatically improving casing strength for superior durability and toughness.

New chemical fillers in the tread compound increase molecular toughness and create a difficult path for cracks to propagate. This results in improved cut/chip resistance during off-road driving.

Traditional Compound HSR Filler Compound

- 1 New pattern design featuring deeply sculptured center blocks (blue) that maximize off-road traction while retaining a quieter ride
- 2 Innovative armor sidewall design (yellow) maximizes sidewall traction and puncture resistance
- 3 New off-road compound featuring new chemical fillers for maximum tear resistance and tread life

A premium mud terrain tire with a motor sports pedigree, the MT-764 features the same tough, durable construction design but improves on off-road performance with a new aggressive pattern that improves self-cleaning performance in mud. The shoulders feature staggered lugs for additional bite when sidewall traction is needed.

- Staggered shoulder lugs for added traction on uneven terrain
- Deep tread blocks with high void-ratio tread pattern improve self-cleaning performance in mud
- 3D tread block design provides additional traction edge on slippery and wet terrain
- Stone-ejector elements in tread area minimize rock retention
- Aggressive sidewall design provides additional traction and puncture protection on demanding terrain
- Three-body-ply construction in select sizes for additional puncture resistance and toughness
- M&S All-season rated

- 1 **Serrated Shoulder Block**
Provides additional side bite in difficult off-road situations.
- 2 **Rugged Sidewall Blocks**
Aggressive sidewall blocks increase puncture resistance and improve traction in deep mud.

**EXTREME
LIGHT TRUCK**

Designed to conquer slightly different terrain than the Trepador bias, the Creepy Crawler also features a conformable bias-ply casing to maximize the contact patch on uneven off-road terrain. The unique pattern and sidewall design excel on mud and rocky terrain.

- Special bias-ply construction design allows the M8090 to conform to varying terrain surfaces for maximum rock-crawling performance
- Stone ejectors provide protection against tread cap damage from sharp rocks
- Unique multi-edged knob design and sipe arrangement enhance traction on slippery surfaces
- Large shoulder lugs and sidewall design provide unparalleled side bite in difficult off-road terrain
- M&S All-Season rated
- DOT-approved for highway use
- Recommended maximum speed of 65mph

Designed for the rigors of high-speed off-roading, the Trepador radial features high-strength materials in a robust radial design for maximum puncture resistance and high-speed stability. Staggered shoulder blocks and multi-curve siping provide extra traction edges for additional traction bite on difficult terrain.

- Aggressive directional tread design provides excellent traction on and off-road
- Multi-curve siping improves traction on loose dirt and other slippery surfaces
- Arrangement ensures a uniform contact area for sure-footed handling
- Jointless spiral-wound cap-ply maximizes ride refinement and durability
- Multi-stage staggered shoulder pattern provides improved side bite on difficult terrain
- Nylon belt-reinforced tire construction improves puncture resistance and prolongs tread life
- M&S All-Season rated
- DOT-Approved for highway use

Designed to conquer off-road terrain with ease, the Trepador Bias features a conformable bias ply casing with ultra aggressive sidewall design for excellent off-road traction on sand and rocks. To improve on-road stability and performance, the tire also features a nylon belt reinforcement for extra high-speed stability while improving puncture resistance as well.

- Heavy-duty bias ply construction for excellent durability and tread flexibility
- Multi-curve tread siping improves traction on loose dirt and slippery terrain
- Unique tread element arrangement ensures a uniform contact area for maximum road contact
- Aggressive side lug design provides improved side-bite on difficult off-road and rocky terrain
- Nylon belt-reinforced tire construction improves puncture resistance
- M&S All-Season rated
- Please visit www.maxxis.com for storage guidelines
- DOT-approved for highway use
- Recommended maximum speed of 65mph

Based on the Trepador Bias, the legendary Trepador Competition uses the same construction and pattern design, but features a sticky race tread compound for the ultimate in off-road traction. Due to the nature of the compound, it is not recommended for use in winter conditions.

- Heavy-duty bias-ply construction for excellent durability and tread flexibility
- Aggressive soft competition tread compound for ultimate off-road traction
- Multi-curve tread siping improves traction on loose dirt and slippery terrain
- Unique tread element arrangement ensures uniform contact area for maximum road contact
- Aggressive side lug design provides improved side-bite on difficult off-road and rocky terrain
- Nylon belt-reinforced tire construction improves puncture resistance and high-speed stability
- Do not use in winter conditions - Please visit www.maxxis.com for more details
- Recommended for competition use only
- DOT-approved for highway use
- Recommended maximum speed of 65mph

A studdable ice tire featuring a square shoulder design for enhanced grip in difficult icy and snowy conditions.

- Directional tread design promotes water evacuation and improves self-cleaning performance for winter peace of mind
- 3D siping and optimized stud holes across tread area improve overall winter performance
- High-modulus steel belt design improves road puncture resistance and handling
- Special winter compound offers excellent traction even in extreme winter conditions
- M&S/Mountain Snowflake symbol certification

Conventional sipes allow the tread block to move and squirm freely. This causes abnormal wear.

New 3D ripple sipes form an interlocking mechanism to minimize unnecessary movement and promote even tread wear.

- 1 Unique individual shoulder block design (green)**
Provides extra traction edges for enhanced traction in the snow.
- 2 3D ripple sipes and optimized stud holes (red)**
Improve overall winter performance.

A modern ice tire featuring a saw-tooth tread pattern for superior handling and traction in European winter conditions.

- Asymmetrical snow tire designed for European winter conditions
- High-density 3D ripple sipes improve overall wear pattern and traction on snowy and icy surfaces
- Silica-infused tread compound widens operational temperature range and increases traction on snow and ice
- Saw-tooth pattern design offers superior handling and traction on snowy surfaces
- Bridged shoulder blocks increase tread stiffness and improve tread contact and cornering stability
- M&S/Mountain Snowflake symbol certification

Highly dispersible silica in Maxxis' new compound promotes excellent filler dispersion - minimizing heat generation and energy dissipation for improved rolling resistance.

- 1 Saw-Tooth pattern design (blue)** digs into snow to offer superior handling and traction
- 2 Bridged shoulder blocks (green)** increase tread stiffness and improve tread contact and cornering stability
- 3 New 3D ripple sipes (red)** form an interlocking mechanism to minimize unnecessary movement and promote even tread wear

Introducing a new family of winter ice tires, the Premitra SP-03 features a high dispersion silica compound for improved traction under challenging winter conditions. The tire also features our new honeycomb sipe design, which provides additional traction edges in multiple directions to enhance traction under all driving conditions.

- High dispersion silica compound lowers compound operating temperature range for maximum traction under winter conditions
- New honeycomb sipe design adds traction edges in multiple directions to enhance traction under all driving conditions
- Center rib features the more traditional 3D sipe design to enhance traction under acceleration and braking for additional peace of mind
- EU Label: C/E/71dB
- M&S/Mountain Snowflake symbol certification

Highly dispersible silica in Maxxis' new compound promotes excellent filler dispersion - minimizing heat generation and energy dissipation for improved rolling resistance.

- 1 High dispersion silica compound (blue) lowers compound operating temperature range for maximum traction under winter conditions
- 2 New honeycomb sipe design (red) adds traction edges in multiple directions to ensure great traction under all driving conditions
- 3 3D wave sipe design (yellow) on the tread center rib to enhance traction edge under braking and acceleration for additional peace of mind

A modern SUV ice tire featuring a saw-tooth tread pattern for superior handling and traction.

- Large block tread design for increased traction and better handling in snowy conditions
- Directional pattern provides improved snow-clearing performance and consistent traction
- Saw-tooth block and high-density sipe arrangement for improved grip on snow and ice
- Multi-pitch tread design minimizes pattern noise for excellent ride refinement
- Specially formulated compound for excellent traction on snow and ice
- M&S/Mountain Snowflake symbol certification

- 1 Saw-tooth edged blocks (green) increase surface bite for improved traction
- 2 Step down shoulder block design (blue) increases side bite for improved traction in deep and heavy snow

- 1 Unique groove design (blue) maximizes water and snow evacuation, ensuring good road contact for improved traction
- 2 High density 3D ripple sipes (red) increase traction edges on the tread surface for improved traction under acceleration and braking

A true European all-season winter tire featuring the latest snow compound and construction for improved high-speed stability and handling.

- Improved silica compound with better traction in low temperatures
- Newly engineered all-season pattern featuring 3D wave sipes on tread surface increases traction edges for improved braking, handling and overall traction
- New high-strength construction materials improve overall driving confidence and handling
- M&S/Mountain Snowflake symbol certification

Highly dispersible silica in Maxxis' new compound promotes excellent filler dispersion - minimizing heat generation and energy dissipation for improved rolling resistance.

1 Saw-Tooth pattern design digs into snow to offer superior handling and traction

Designed as a new age all-season tire for vans, the new AL2 utilizes the latest in compound technology to improve wet and winter traction while minimizing rolling resistance. The tire also features new siping design to improve overall traction on slippery surfaces.

- Advanced full nano-silica compound with reduced rolling resistance and improved wet weather performance
- New slim bead filler design further reduces rolling resistance while improving ride comfort
- High modulus chafer rubber increases durability under demanding load conditions
- Reinforced shoulder blocks minimize irregular wear and improve endurance
- Multi-Angle sipe design provides traction edges in multiple directions for improved overall traction on slippery surfaces
- M&S/Mountain Snowflake symbol certification

- 1 Advanced silica tread compound lowers rolling resistance and enhances wet performance
- 2 High Strength belt design improves high-speed safety and durability
- 3 New bead filler design improves rolling resistance and ride comfort

- 1 Reinforced shoulder block design (blue) improves overall wear and durability
- 2 Three wide circumferential grooves (yellow) improve hydroplaning resistance
- 3 Open shoulder groove design (orange) enhances wet handling
- 4 Multi-angle sipe design (green) improves traction under difficult winter conditions

New all-season triple-polymer compound combines three separately engineered rubber compounds to improve winter traction and handling. The new tread compound also features highly dispersible nano-silica to improve wet performance.

- Low Temperature Rubber
- High Reactive Rubber
- Ultra Elastic Rubber
- Highly Dispersible nano-silica
- Coupling Agent

A premium passenger snow tire designed to tackle tough winter weather for maximum peace of mind.

- Improved silica compound with better traction in low temperatures
- Unique V pattern featuring 3D wave sipes on tread surface increases traction edges for improved braking, handling and overall traction
- New high-strength construction materials improve overall driving confidence and handling
- M&S/Mountain Snowflake symbol certification

Highly dispersible silica in Maxxis' new compound promotes excellent filler dispersion - minimizing heat generation and energy dissipation for improved rolling resistance.

1 Directional V Tread pattern increases water and snow dispersion for improved traction under slippery conditions

Designed as a modern winter tire for vans, the new WL2 uses our latest nano silica compound technology to improve winter traction and tread wear. The WL2 also features a new pattern design with high density 3D wave sipes to improve all-weather handling and braking performance.

- Advanced full nano-silica compound with reduced rolling resistance and improved wet weather performance
- New slim bead filler design further reduces rolling resistance while improving ride comfort
- High modulus chafer rubber increases durability under demanding load conditions
- Rib Pattern design improves wear under heavy load conditions
- High-density 3D wave sipe design provides multiple traction edges for improved traction on slippery surfaces
- M&S/Mountain Snowflake symbol certification

1 Advanced silica tread compound lowers rolling resistance and enhances wet performance

2 High tension nylon cap ply maximizes high speed stability

3 New bead filler design improves rolling resistance and ride comfort

1 Three wide circumferential grooves (yellow) improve hydroplaning resistance

2 Wide shoulder groove design (orange) enhances snow grip performance

3 High density 3D sipe design (green) enhances traction on ice and snow

4 Ribbed center block design (blue) improves load capacity and durability

Winter Road Surface

New winter tread compound combines 2 unique rubber compounds into one to improve traction on snow and ice surfaces. The new tread compound also features highly dispersible Nano-Silica to improve wet performance.

- Low Temperature Rubber
- Highly Dispersible nano-silica
- Coupling Agent

A traditional commercial snow tire designed to tackle most winter conditions.

- High sipe density for additional traction on ice
- Multi-pitch tread block design minimizes pattern noise
- Advanced low temperature compound enhances braking performance
- M&S/Mountain Snowflake symbol certification

A commercial, studdable winter tire designed to tackle the toughest winter conditions.

- Directional tread pattern, pinned for studs
- Reinforced tread blocks minimize tread squirm and enhance overall traction for surefooted handling
- Saw-tooth tread block design digs into snow for extra traction
- Multi-pitch tread block design minimizes pattern noise
- M&S/Mountain Snowflake symbol certification

COMMERCIAL

COMMERCIAL

Well-known for its durability, the UE-168 features a tough construction design with high-end rugged materials. The rib pattern design improves overall tread wear, while the shoulder grooves help improve all-season traction in inclement weather.

- **Double steel-belted construction for long-lasting wear and uniformity**
- **Jointless spiral-wound cap-ply maximizes ride refinement and durability**
- **Rib-type tread design with deep shoulder grooves provides all-season capability**
- **Continuous shoulder ribs provide smooth, even tread wear and increased tread life**
- **Premium rubber compound and extra plies resist cuts, punctures and abrasions**
- **Extra heavy-duty sidewall construction delivers responsive handling and performance in demanding commercial applications**
